

# Neuberger Berman Advisers Management Trust Large Cap Value Portfolio

I Class Shares

Annual Report

December 31, 2013

---

# Large Cap Value Portfolio Commentary (Unaudited)

The Neuberger Berman Advisers Management Trust (AMT) Large Cap Value Portfolio Class I generated a 31.14% total return for the fiscal year ended December 31, 2013, underperforming its benchmark, the Russell 1000® Value Index, which returned 32.53%.

Market participants began 2013 in a cautious mood. Europe's economy was battered amid a series of sovereign debt crises, China was experiencing rising inflation and unrest in the Middle East dominated headlines. In the U.S., the federal budget had been slashed while payroll taxes had been increased. However, the U.S. Federal Reserve (the Fed) continued to provide extraordinary stimulus to the recovering economy through its bond-buying program. Unemployment fell, housing data improved, retail sales rose, durable goods orders were strong, and corporate earnings were encouraging.

Markets rose within this positive economic environment, but not without some stumbles along the way. Investors kept watchful and worried eyes on the Fed, which had prepared investors for an eventual tapering of its bond-buying program. In December, the Fed announced that it would begin to reduce monthly asset purchases in January 2014, from \$85 billion to \$75 billion. Market participants were also unnerved by political dysfunction in Washington, D.C., which had led to a government shutdown in October, and by uncertainty regarding the effects of the new health care law. The final quarter of 2013, however, provided a strong finish for what had been a generally excellent year for equity investors.

Financials and Health Care were among the top-performing sectors within the large-cap value space in 2013, while Telecommunication Services, Utilities and Materials lagged. Financial stocks benefited from a steepening yield curve and from increased levels of financial transactions as the economy improved. Health Care stocks rebounded from the uncertainty that had weighed them down immediately following the passage of the new health care law. As investors gained greater insight into the law's impact, the stocks moved considerably higher. Telecommunication Services and Utilities trailed other areas of the market that had more to gain from an improving economy, while Materials lost ground as commodity prices fell.

Within our Portfolio, Financials drove performance relative to the index, due largely to favorable stock selection. Lincoln National was the Portfolio's top performer for the year. The life insurance company's mid-size status was a benefit as the company never ran the risk of being designated a non-bank SIFI (Systemically Important Financial Institution). Non-bank entities that are designated as SIFIs are likely to be subject to increased regulation under new legislation. Lincoln National, which we purchased at attractive prices and weighted heavily, is, in our view, well run, has returned significant cash to shareholders, and has benefited from the steepening yield curve. Invesco was another financial stock that contributed positively to both absolute and relative returns, benefiting from increased financial activity during the year and higher asset values.

Another strong performer for the Portfolio was Best Buy. This Consumer Discretionary company delivered outstanding returns in 2013. The stock had been heavily discounted as investors predicted its demise as a result of the success of online shopping. However, the company retained a new management team that was able to keep customers coming into their brick-and-mortar stores.

Relative to the Russell 1000 Value Index, we also benefited from our limited exposure to Utilities, which underperformed the rest of the index for the year. We had been unable to find value within the sector and so had a very light weighting in the sector relative to the index.

Materials and Information Technology detracted from relative returns in 2013. Within Materials, both an overweight and stock selection hurt. Newmont Mining delivered the greatest negative impact relative to the index. The company suffered as gold prices fell steadily throughout 2013. The Mosaic Company, a major global producer of the fertilizer potash, also hurt both absolute and relative returns. The company's share price fell when a large potash producer unexpectedly withdrew from a powerful consortium, leading to worries that prices for the commodity could fall around the world. Within Information Technology, Altera was the Portfolio's worst detractor, and we had a relatively heavy weighting in the stock. This digital component manufacturer saw its share price fall when a large order that had been expected from China failed to materialize.

---

In spite of the many concerns we had as 2013 began, the year delivered excellent overall returns for equity investors. While we see many reasons for continued optimism, we remain cautious and mindful of the risks and the uncertainty that could derail markets, particularly the ongoing crisis in the Middle East and political turmoil in Washington.

In such an environment, we believe that stock picking will perhaps be even more critical. We believe the stocks we are pursuing for the Portfolio are undervalued based on normalized earnings and that their value will be recognized by the market over time. As always, we pay close attention to the correlation between holdings in an attempt to create a Portfolio with an optimal risk/return balance that has the potential to outperform over the long term.

Sincerely,

A handwritten signature in black ink that reads "Eli Salzman". The signature is written in a cursive, flowing style.

ELI M. SALZMANN  
PORTFOLIO MANAGER

**Information about the principal risks of investing in the Portfolio is set forth in the prospectus and statement of additional information.**

## SECTOR ALLOCATION

(as a % of Total Investments)

Consumer Discretionary	3.8%
Consumer Staples	4.4
Energy	7.1
Financials	34.2
Health Care	8.6
Industrials	17.8
Information Technology	7.7
Materials	10.5
Telecommunication Services	1.2
Utilities	0.8
Short-Term Investments	3.9
Total	100.0%

## PERFORMANCE HIGHLIGHTS

	Inception Date	Average Annual Total Return Ended 12/31/2013			
		1 Year	5 Years	10 Years	Life of Fund
Large Cap Value Portfolio Class I	03/22/1994	31.14%	19.60%	7.22%	8.59%
Russell 1000® Value Index <sup>1,2</sup>		32.53%	16.67%	7.58%	9.75%

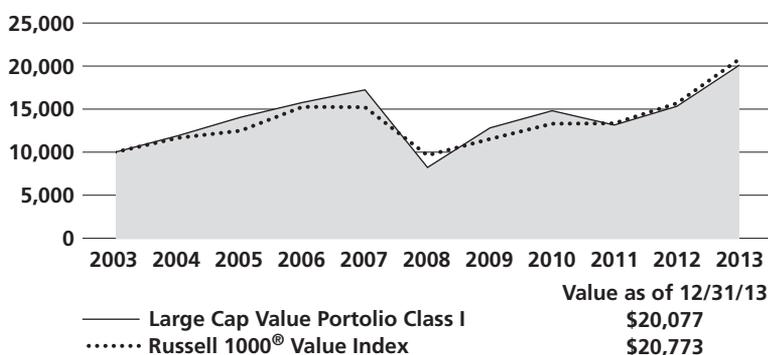

The performance data quoted represent past performance and do not indicate future results. Current performance may be lower or higher than the performance data quoted. For more current performance data, please visit <http://www.nb.com/amtportfolios/performance>.

The results shown in the table reflect the reinvestment of income dividends and other distributions, if any. The results do not reflect the effect of taxes a shareholder would pay on Portfolio distributions or on the redemption of Portfolio shares. The results do not reflect fees and expenses of the variable annuity and variable life insurance policies or the qualified pension and retirement plans whose proceeds are invested in the Portfolio. The investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost.

Returns would have been lower if Neuberger Berman Management LLC ("Management") had not reimbursed certain expenses and/or waived a portion of the investment management fees during certain of the periods shown. Repayment by a class (of expenses previously reimbursed and/or fees previously waived by Management) will decrease the class's returns. Please see Note B in the Notes to Financial Statements for specific information regarding expense reimbursement and/or fee waiver arrangements.

As stated in the Portfolio's most recent prospectus, the total annual operating expense ratio for fiscal year 2012 was 1.15% for Class I shares (before expense reimbursements and/or fee waivers, if any).

## COMPARISON OF A \$10,000 INVESTMENT

This graph shows the change in value of a hypothetical \$10,000 investment in the Portfolio over the past 10 fiscal years, or since the Portfolio's inception, if it has not operated for 10 years. The result is compared with benchmarks, which include a broad based market index and may include a more narrowly based index. Market indices have not been reduced to reflect any of the fees and costs of investing. The results shown in the graph reflect the reinvestment of income dividends and other distributions, if any. The results do not reflect the effect of taxes a shareholder would pay on Portfolio distributions or on the redemption of Portfolio shares. The results do not reflect fees and expenses of the variable annuity and variable life insurance policies or the qualified pension and retirement plans whose proceeds are invested in the Portfolio. Results represent past performance and do not indicate future results.

Please see Endnotes for additional information.

---

## Endnotes

- 1 The date used to calculate Life of Fund performance for the index is March 22, 1994, the Portfolio's commencement of operations.
- 2 The Russell 1000® Value Index measures the performance of those Russell 1000® Index companies with lower price to book ratios and lower forecasted growth values. The Russell 1000 Index measures the performance of the 1,000 largest companies in the Russell 3000® Index (which measures the performance of the 3,000 largest U.S. public companies based on total market capitalization). The Russell 1000 Index represents approximately 92% of the total market capitalization of the Russell 3000 Index. Please note that indices do not take into account any fees, expenses or tax consequences of investing in the individual securities that they track, and that individuals cannot invest directly in any index. Data about the performance of an index are prepared or obtained by Neuberger Berman Management LLC ("Management") and reflect the reinvestment of income dividends and other distributions, if any. The Portfolio may invest in securities not included in a described index and/or may not invest in all securities included in a described index.

Any ratios or other measurements using a factor of forecasted earnings of a company discussed herein are based on consensus estimates, not Management's own projections, and they may or may not be realized. By quoting them herein, Management does not offer an opinion as to the accuracy of and does not guarantee these forecasted numbers.

The investments for the Portfolio are managed by the same portfolio manager(s) who manage(s) one or more other registered funds that have names, investment objectives and investment styles that are similar to those of the Portfolio. You should be aware that the Portfolio is likely to differ from those other mutual fund(s) in size, cash flow pattern and tax matters. Accordingly, the holdings and performance of the Portfolio can be expected to vary from those of the other mutual fund(s).

Shares of the separate AMT Portfolios are not available to the general public. Shares of this Portfolio may be purchased only by life insurance companies to be held in their separate accounts that fund variable annuity and variable life insurance policies and by qualified pension and retirement plans.

Shares of the AMT Portfolios are sold only through the currently effective prospectuses, which must precede or accompany this report.

# Information About Your Fund's Expenses (Unaudited)

As a Fund shareholder, you incur two types of costs: (1) transaction costs such as fees and expenses that are, or may be, imposed under your variable contract or qualified pension plan; and (2) ongoing costs, including management fees, distribution and/or service (12b-1) fees (if applicable), and other Fund expenses. This example is intended to help you understand your ongoing costs (in U.S. dollars) of investing in the Fund and compare these costs with the ongoing costs of investing in other mutual funds.

This table is designed to provide information regarding costs related to your investments. The following examples are based on an investment of \$1,000 made at the beginning of the six month period ended December 31, 2013 and held for the entire period. The table illustrates the Fund's costs in two ways:

**Actual Expenses and Performance:** The first section of the table provides information about actual account values and actual expenses in dollars, based on the Fund's actual performance during the period. You may use the information in this line, together with the amount you invested, to estimate the expenses you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first section of the table under the heading entitled "Expenses Paid During the Period" to estimate the expenses you paid over the period.

**Hypothetical Example for Comparison Purposes:** The second section of the table provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return at 5% per year before expenses. This return is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in this Fund versus other funds. To do so, compare the expenses shown in this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses in the table are meant to highlight your ongoing costs only and do not include any transaction costs, such as fees and expenses that are, or may be imposed under your variable contract or qualified pension plan. Therefore, the information under the heading "Hypothetical (5% annual return before expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transaction costs were included, your costs would have been higher.

## Expense Information as of 12/31/13

### NEUBERGER BERMAN ADVISERS MANAGEMENT TRUST LARGE CAP VALUE PORTFOLIO

	Beginning Account Value 7/1/13	Ending Account Value 12/31/13	Expenses Paid During the Period* 7/1/13 – 12/31/13
<b>Actual</b>			
Class I	\$1,000.00	\$1,156.80	\$6.03
<b>Hypothetical (5% annual return before expenses)**</b>			
Class I	\$1,000.00	\$1,019.61	\$5.65

\* Expenses are equal to the annualized expense ratio of 1.11%, multiplied by the average account value over the period, multiplied by 184/365 (to reflect the one-half year period shown).

\*\* Hypothetical 5% annual return before expenses is calculated by multiplying the number of days in the most recent half year divided by 365.

# Notes to Schedule of Investments Large Cap Value Portfolio

† In accordance with Accounting Standards Codification (“ASC”) 820 “Fair Value Measurements and Disclosures” (“ASC 820”), all investments held by Neuberger Berman Advisers Management Trust Large Cap Value Portfolio (the “Fund”) are carried at the value that Neuberger Berman Management LLC (“Management”) believes the Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment under current market conditions. Various inputs, including the volume and level of activity for the asset or liability in the market, are considered in valuing the Fund’s investments, some of which are discussed below. Significant management judgment may be necessary to value investments in accordance with ASC 820.

ASC 820 established a three-tier hierarchy of inputs to create a classification of value measurements for disclosure purposes. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1 – quoted prices in active markets for identical investments
- Level 2 – other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, amortized cost, etc.)
- Level 3 – significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing an investment are not necessarily an indication of the risk associated with investing in those securities.

The value of the Fund’s investments in equity securities and exchange traded funds, for which market quotations are readily available, is generally determined by Management by obtaining valuations from an independent pricing service based on the latest sale price quoted on a principal exchange or market for that security (Level 1 inputs). Securities traded primarily on the NASDAQ Stock Market are normally valued by the Fund at the NASDAQ Official Closing Price (“NOCP”) provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., Eastern time, unless that price is outside the range of the “inside” bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Because of delays in reporting trades, the NOCP may not be based on the price of the last trade to occur before the market closes. If there is no reported sale of a security on a particular day, the independent pricing service may value the security based on reported market quotations.

Management has developed a process to periodically review information provided by independent pricing services for all types of securities.

Investments in investment companies are valued using the respective fund’s daily calculated net asset value per share (Level 2 inputs).

If a valuation is not available from an independent pricing service, or if Management has reason to believe that the valuation received does not represent the amount the Fund might reasonably expect to receive on a current sale in an orderly transaction, the Fund seeks to obtain quotations from principal market makers (generally considered Level 3 inputs). If such quotations are not readily available, the security is valued using methods the Neuberger Berman Advisers Management Trust’s Board of Trustees (the “Board”) has approved on the belief that they reflect fair value. Numerous factors may be considered when determining the fair value of a security based on Level 2 or 3 inputs, including available analyst, media or other reports, trading in futures or American Depositary Receipts (“ADRs”) and whether the issuer of the security being fair valued has other securities outstanding.

The value of the Fund’s investments in foreign securities is generally determined using the same valuation methods and inputs as other Fund investments, as discussed above. Foreign security prices expressed in local currency values are translated from the local currency into U.S. dollars using the exchange rates as of 4:00 p.m., Eastern time. The Board has approved the use of Interactive Data Pricing and Reference Data, Inc. (“Interactive”) to assist in

## Notes to Schedule of Investments Large Cap Value Portfolio (cont'd)

determining the fair value of foreign equity securities when changes in the value of a certain index suggest that the closing prices on the foreign exchanges may no longer represent the amount that the Fund could expect to receive for those securities or on days when foreign markets are closed and U.S. markets are open. In each of these events, Interactive will provide adjusted prices for certain foreign equity securities using a statistical analysis of historical correlations of multiple factors (Level 2 inputs). In the absence of precise information about the market values of these foreign securities as of the close of the New York Stock Exchange, the Board has determined on the basis of available data that prices adjusted in this way are likely to be closer to the prices the Fund could realize on a current sale than are the prices of those securities established at the close of the foreign markets in which the securities primarily trade.

Fair value prices are necessarily estimates, and there is no assurance that such a price will be at or close to the price at which the security is next quoted or next trades.

The following is a summary, categorized by Level, of inputs used to value the Fund's investments as of December 31, 2013:

<b>Asset Valuation Inputs</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
Investments:				
Common Stocks <sup>^</sup>	\$66,888,039	\$ —	\$—	\$66,888,039
Short-Term Investments	—	2,679,973	—	2,679,973
<b>Total Investments</b>	<b>\$66,888,039</b>	<b>\$2,679,973</b>	<b>\$—</b>	<b>\$69,568,012</b>

<sup>^</sup> The Schedule of Investments provides information on the industry categorization for the portfolio.

The Fund had no transfers between Levels 1 and 2 during the year ended December 31, 2013.

<sup>##</sup> At December 31, 2013, the cost of investments for U.S. federal income tax purposes was \$58,884,760. Gross unrealized appreciation of investments was \$11,006,182 and gross unrealized depreciation of investments was \$322,930, resulting in net unrealized appreciation of \$10,683,252, based on cost for U.S. federal income tax purposes.

<sup>\*</sup> Security did not produce income during the last twelve months.

# Notes to Financial Statements Large Cap Value Portfolio

## Note A—Summary of Significant Accounting Policies:

- 1 General:** Neuberger Berman Advisers Management Trust (the “Trust”) is a Delaware statutory trust organized pursuant to a Trust Instrument dated May 23, 1994. The Trust is currently comprised of ten separate operating series (each individually a “Series,” and collectively the “Funds”) each of which is diversified. The Trust is registered as an open-end management investment company under the Investment Company Act of 1940, as amended (the “1940 Act”), and its shares are registered under the Securities Act of 1933, as amended. The Fund currently offers only Class I shares. The Board may establish additional series or classes of shares without the approval of shareholders.

The assets of each Series belong only to that Series, and the liabilities of each Series are borne solely by that Series and no other.

The preparation of financial statements in accordance with U.S. generally accepted accounting principles (“GAAP”) requires Management to make estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates.

Shares of the Fund are not available to the general public and may be purchased only by life insurance companies to be used with their separate accounts that fund variable annuity and variable life insurance policies and by qualified pension and retirement plans.

- 2 Portfolio valuation:** Investment securities are valued as indicated in the notes following the Schedule of Investments.
- 3 Foreign currency translation:** The accounting records of the Fund are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars using the exchange rate as of 4:00 p.m., Eastern time, to determine the value of investments, other assets and liabilities. Purchase and sale prices of securities, and income and expenses, are translated into U.S. dollars at the prevailing rate of exchange on the respective dates of such transactions. Net unrealized foreign currency gain (loss), if any, arises from changes in the value of assets and liabilities, other than investments in securities, as a result of changes in exchange rates and is stated separately in the Statement of Operations.
- 4 Securities transactions and investment income:** Securities transactions are recorded on trade date for financial reporting purposes. Dividend income is recorded on the ex-dividend date or, for certain foreign dividends, as soon as the Fund becomes aware of the dividends. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of original issue discount, where applicable, and accretion of discount on short-term investments, if any, is recorded on the accrual basis. Realized gains and losses from securities transactions and foreign currency transactions, if any, are recorded on the basis of identified cost and stated separately in the Statement of Operations. Included in net realized gain (loss) on investments are proceeds from the settlements of class action litigation in which the Fund participated as a class member. The amount of such proceeds for the year ended December 31, 2013 was \$267,960.
- 5 Income tax information:** Each Series is treated as a separate entity for U.S. federal income tax purposes. It is the policy of the Fund to continue to qualify for treatment as a regulated investment company by complying with the requirements of the U.S. Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its net investment income and net realized capital gains to its shareholders. To the extent the Fund distributes substantially all of its net investment income and net realized capital gains to shareholders, no federal income or excise tax provision is required.

The Fund has adopted the provisions of ASC 740 “Income Taxes” (“ASC 740”). ASC 740 sets forth a minimum threshold for financial statement recognition of a tax position taken, or expected to be taken, in a tax return. The Fund recognizes interest and penalties, if any, related to unrecognized tax positions as an income tax expense in the

Statement of Operations. The Fund is subject to examination by U.S. federal and state tax authorities for returns filed for the prior three fiscal years 2010 - 2012. As of December 31, 2013, the Fund did not have any unrecognized tax positions.

Income distributions and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP. These differences are primarily due to differing treatments of income and gains on various investment securities held by the Fund, timing differences and differing characterization of distributions made by the Fund. The Fund may also utilize earnings and profits distributed to shareholders on redemption of shares as a part of the dividends-paid deduction for income tax purposes.

As determined on December 31, 2013, permanent differences resulting primarily from different book and tax accounting were reclassified at year end. Such differences are attributed to foreign currency gains and losses. These reclassifications had no effect on net income, net asset value ("NAV") or NAV per share of the Fund. For the year ended December 31, 2013, the Fund recorded the following permanent reclassifications:

<b>Paid-in Capital</b>	<b>Undistributed Net Investment Income (Loss)</b>	<b>Accumulated Net Realized Gains (Losses) on Investments</b>
\$—	\$(13,386)	\$13,386

For tax purposes, distributions of short-term gains are taxable to shareholders as ordinary income.

The tax character of distributions paid during the years ended December 31, 2013 and December 31, 2012 was as follows:

<b>Distributions Paid From:</b>					
<b>Ordinary Income</b>		<b>Long-Term Capital Gain</b>		<b>Total</b>	
<b>2013</b>	<b>2012</b>	<b>2013</b>	<b>2012</b>	<b>2013</b>	<b>2012</b>
\$741,925	\$254,987	\$—	\$—	\$741,925	\$254,987

As of December 31, 2013, the components of distributable earnings (accumulated losses) on a U.S. federal income tax basis were as follows:

<b>Undistributed Ordinary Income</b>	<b>Undistributed Long-Term Gain</b>	<b>Unrealized Appreciation (Depreciation)</b>	<b>Loss Carryforwards and Deferrals</b>	<b>Other Temporary Differences</b>	<b>Total</b>
\$511,452	\$—	\$10,683,252	\$(3,124,670)	\$—	\$8,070,034

The differences between book basis and tax basis distributable earnings are primarily due to: timing differences of wash sales, open return of capital basis adjustments and capital loss carryforwards.

To the extent the Fund's net realized capital gains, if any, can be offset by capital loss carryforwards, it is the policy of the Fund not to distribute such gains. The Regulated Investment Company ("RIC") Modernization Act of 2010 (the "Act") became effective for the Fund on January 1, 2011. The Act modernizes several of the federal income and excise tax provisions related to RICs. Among the changes made are changes to the capital loss carryforward rules allowing for RICs to carry forward capital losses indefinitely and to retain the character of capital loss carryforwards as short-term or long-term ("Post-Enactment"). Rules in effect previously limited the carryforward period to eight years and all carryforwards were considered short-term in character ("Pre-Enactment"). As determined at December 31, 2013, the Fund had unused capital loss carryforwards available for federal income tax purposes to offset net realized capital gains, if any, as follows:

<b>Pre-Enactment Expiring in: 2017</b>
\$3,124,670

---

Post-Enactment capital loss carryforwards must be fully used before Pre-Enactment capital loss carryforwards; therefore, under certain circumstances, Pre-Enactment capital loss carryforwards available as of the report date may expire unused. As of December 31, 2013, the Fund had no Post-Enactment capital loss carryforwards.

During the year ended December 31, 2013, the Fund utilized capital loss carryforwards of \$12,572,637.

- 6 Distributions to shareholders:** The Fund may earn income, net of expenses, daily on its investments. Distributions from net investment income and net realized capital gains, if any, generally are distributed once a year (usually in October). Income distributions and capital gain distributions to shareholders are recorded on the ex-date.
- 7 Foreign taxes:** Foreign taxes withheld, if any, represent amounts withheld by foreign tax authorities, net of refunds recoverable.
- 8 Expense allocation:** Certain expenses are applicable to multiple funds. Expenses directly attributable to a Series are charged to that Series. Expenses of the Trust that are not directly attributable to a particular series of the Trust (e.g., the Fund) are allocated among the series of the Trust, on the basis of relative net assets, except where a more appropriate allocation of expenses to each of the series can otherwise be made fairly. Expenses borne by the complex of related investment companies, which includes open-end and closed-end investment companies for which Management serves as investment manager, that are not directly attributable to a particular investment company in the complex (e.g., the Trust) or series thereof are allocated among the investment companies in the complex or series thereof, on the basis of relative net assets, except where a more appropriate allocation of expenses to each of the investment companies in the complex or series thereof can otherwise be made fairly.
- 9 Investments in foreign securities:** Investing in foreign securities may involve certain sovereign and other risks, in addition to the credit and market risks normally associated with domestic securities. These additional risks include the possibility of adverse political and economic developments (including political instability, nationalization, expropriation, or confiscatory taxation) and the potentially adverse effects of unavailability of public information regarding issuers, less governmental supervision and regulation of financial markets, reduced liquidity of certain financial markets, and the lack of uniform accounting, auditing, and financial reporting standards or the application of standards that are different or less stringent than those applied in the United States. Foreign securities also may experience greater price volatility, higher rates of inflation, and delays in settlement.
- 10 Indemnifications:** Like many other companies, the Trust's organizational documents provide that its officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In addition, both in some of its principal service contracts and in the normal course of its business, the Trust enters into contracts that provide indemnifications to other parties for certain types of losses or liabilities. The Trust's maximum exposure under these arrangements is unknown as this could involve future claims against the Trust.

## Note B—Management Fees, Administration Fees, Distribution Arrangements, and Other Transactions with Affiliates:

The Fund retains Management as its investment manager under a Management Agreement. For such investment management services, the Fund pays Management a fee at the annual rate of 0.55% of the first \$250 million of the Fund's average daily net assets, 0.525% of the next \$250 million, 0.50% of the next \$250 million, 0.475% of the next \$250 million, 0.45% of the next \$500 million, 0.425% of the next \$2.5 billion, and 0.40% of average daily net assets in excess of \$4 billion. Accordingly, for the year ended December 31, 2013, the management fee pursuant to the Management Agreement was equivalent to an annual effective rate of 0.55% of the Fund's average daily net assets.

The Fund retains Management as its administrator under an Administration Agreement. The Fund pays Management an administration fee at the annual rate of 0.30% of its average daily net assets under this agreement. Additionally, Management retains State Street Bank and Trust Company ("State Street") as its sub-administrator under a Sub-Administration Agreement. Management pays State Street a fee for all services received under this agreement.

The Board adopted a non-fee distribution plan for the Fund.

Management has contractually undertaken to waive current payment of fees and/or reimburse the Fund for its operating expenses (excluding fees payable to Management, interest, taxes, brokerage commissions, extraordinary expenses and transaction costs, if any; consequently, net expenses may exceed the contractual expense limitations) (“Operating Expenses”) which exceed the expense limitation as detailed in the following table. The Fund has agreed to repay Management for fees and expenses waived and/or its excess Operating Expenses previously reimbursed by Management, so long as its annual Operating Expenses during that period do not exceed its expense limitation in place at the time the fees and expenses were waived or reimbursed, and the repayment is made within three years after the year in which Management issued the reimbursement or waived fees. During the year ended December 31, 2013, there was no repayment to Management under its contractual expense limitation. At December 31, 2013, the Fund had no contingent liability to Management under its contractual expense limitation.

	Contractual Expense Limitation <sup>(1)</sup>	Expiration	Expenses Reimbursed in Fiscal Year Ending December 31, Subject to Repayment Until December 31,		
			2011	2012	2013
			2014	2015	2016
Class I	1.00%	12/31/16	\$—	\$—	\$—

- (1) Expense limitation per annum of the Fund’s average daily net assets.

Neuberger Berman LLC (“Neuberger”) is retained by Management to furnish it with investment recommendations and research information without added cost to the Fund. Several individuals who are officers and/or trustees of the Trust are also employees of Neuberger and/or Management.

Management and Neuberger are indirect subsidiaries of Neuberger Berman Group LLC (“NBG” and together with its consolidated subsidiaries, “NB Group”). As of January 1, 2014, NBSH Acquisition, LLC (“NBSH”), which is owned by certain NB Group employees and permitted transferees, owns 82% of NBG’s equity, and Lehman Brothers Holdings Inc. (“LBHI”) and certain of its subsidiaries (collectively, the “LBHI Parties”) own the remaining 18%. In December 2013, NBG, NBSH and LBHI executed an agreement that permits NBG to accelerate the purchase of the remaining equity owned by the LBHI Parties. It is anticipated that in March 2014 NBSH will own 90% of NBG’s equity, and by March 2015 it is expected that NBG will be 100% employee owned and permitted transferees.

## Note C—Securities Transactions:

During the year ended December 31, 2013, there were purchase and sale transactions (excluding short-term securities) of \$102,671,994 and \$110,766,338, respectively.

During the year ended December 31, 2013, no brokerage commissions on securities transactions were paid to affiliated brokers.

---

## Note D—Fund Share Transactions:

Share activity for the years ended December 31, 2013 and December 31, 2012 was as follows:

	For the Year Ended December 31,	
	2013	2012
Shares Sold	840,371	537,429
Shares Issued on Reinvestment of Dividends and Distributions	53,146	22,706
Shares Redeemed	(1,576,262)	(2,766,023)
Total	(682,745)	(2,205,888)

## Note E—Line of Credit:

At December 31, 2013, the Fund was a participant in a single committed, unsecured \$300,000,000 (\$200,000,000 prior to September 2013) line of credit with State Street, to be used only for temporary or emergency purposes. Other investment companies managed by Management also participate in this line of credit on the same terms. Interest is charged on borrowings under this line of credit at the higher of (a) the Federal Funds Rate plus 1.25% per annum or (b) the overnight LIBOR Rate plus 1.25% per annum. A commitment fee of 0.10% per annum on the unused portion of the available line of credit is charged, of which each participating mutual fund has agreed to pay its pro rata share, based on the ratio of its individual net assets to the net assets of all participants at the time the fee is due and payable. The fee is paid quarterly in arrears. Because several mutual funds participate, there is no assurance that an individual mutual fund will have access to all or any part of the \$300,000,000 at any particular time. There were no loans outstanding pursuant to this line of credit at December 31, 2013. During the year ended December 31, 2013, the Fund did not utilize this line of credit.

At December 31, 2013, the Fund was a participant in a single uncommitted, unsecured \$100,000,000 line of credit with State Street, to be used only for temporary or emergency purposes. Other investment companies managed by Management also participate in this line of credit on the same terms. Interest is charged on borrowings under this line of credit at a variable rate per annum as determined and quoted by State Street at the time a Fund requests a loan. Because several mutual funds participate, there is no assurance that an individual Fund will have access to all or any part of the \$100,000,000 at any particular time. There were no loans outstanding pursuant to this line of credit at December 31, 2013. During the period September (inception of line of credit) through December 2013, the Fund did not utilize this line of credit.

## Note F—Recent Accounting Pronouncement:

In June 2013, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update 2013-08 Financial Services—Investment Companies (Topic 946)—Amendments to the Scope, Measurement, and Disclosure Requirements (“ASU 2013-08”). Effective for interim and annual reporting periods in fiscal years that begin after December 15, 2013, ASU 2013-08 sets forth a methodology for determining whether an entity should be characterized as an investment company and prescribes fair value accounting for an investment company’s non-controlling ownership interest in another investment company. FASB has determined that a fund registered under the 1940 Act automatically meets ASU 2013-08’s criteria for an investment company. Although still evaluating the potential impacts of ASU 2013-08 on the Fund’s financial statements, Management expects that the impact of the Fund’s adoption will be limited to additional financial statement disclosures.

# Financial Highlights

## Large Cap Value Portfolio

The following table includes selected data for a share outstanding throughout each year and other performance information derived from the Financial Statements. Per share amounts that round to less than \$.01 or \$(.01) per share are presented as \$.00 or \$(.00), respectively. Ratios that round to less than .00% or (.00%) per share are presented as .00% or (.00%), respectively. A “—” indicates that the line item was not applicable in the corresponding period.

## Notes to Financial Highlights Large Cap Value Portfolio

- †† Total return based on per share NAV reflects the effects of changes in NAV on the performance of the Fund during each fiscal period. Returns assume income dividends and other distributions, if any, were reinvested. Results represent past performance and do not indicate future results. Current returns may be lower or higher than the performance data quoted. Investment returns and principal may fluctuate and shares when redeemed may be worth more or less than original cost. Total return would have been lower if Management had not reimbursed and/or waived certain expenses. The total return information shown does not reflect charges and other expenses that apply to the separate account or the related insurance policies, and the inclusion of these charges and other expenses would reduce the total return for all fiscal periods shown.
- @ Had the Fund not received the class action proceeds as listed in Note A-4 of the Notes to Financial Statements, total return based on per share NAV for the year ended December 31, 2013 would have been 30.61%.
- # Represents the annualized ratios of net expenses to average daily net assets if Management had not reimbursed certain expenses and/or waived a portion of the investment management fee.
- ‡ Calculated based on the average number of shares outstanding during each fiscal period.
- § Prior to January 1, 2013, the Fund had an expense offset arrangement in connection with its custodian contracts. The impact of expense reductions related to expense offset arrangements, if any, was less than .01%.

---

# Report of Independent Registered Public Accounting Firm

To the Board of Trustees of  
Neuberger Berman Advisers Management Trust and  
Shareholders of Large Cap Value Portfolio

We have audited the accompanying statement of assets and liabilities of Large Cap Value Portfolio, one of the series constituting Neuberger Berman Advisers Management Trust (the “Trust”), including the schedule of investments, as of December 31, 2013, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Trust’s management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Trust’s internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2013 by correspondence with the custodian and others or by other appropriate auditing procedures where replies from others were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Large Cap Value Portfolio, a series of Neuberger Berman Advisers Management Trust, at December 31, 2013, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

## Proxy Voting Policies and Procedures

A description of the policies and procedures that the Trust uses to determine how to vote proxies relating to portfolio securities is available, without charge, by calling 800-877-9700 (toll-free) and on the website of the Securities and Exchange Commission at [www.sec.gov](http://www.sec.gov). Information regarding how the Trust voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is also available, without charge, by calling 800-877-9700 (toll-free), on the website of the Securities and Exchange Commission at [www.sec.gov](http://www.sec.gov), and on Management's website at [www.nb.com](http://www.nb.com).

## Quarterly Portfolio Schedule

The Trust files a complete schedule of portfolio holdings for the Fund with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Trust's Forms N-Q are available on the Securities and Exchange Commission's website at [www.sec.gov](http://www.sec.gov) and may be reviewed and copied at the Securities and Exchange Commission's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 800-SEC-0330. The information on Form N-Q is available upon request, without charge, by calling 800-877-9700 (toll free).

## Notice to Shareholders

100.00% of the dividends earned during the fiscal year ended December 31, 2013 qualifies for the dividends received deduction for corporate shareholders.

## Board Consideration of the Management and Sub-Advisory Agreements

On an annual basis, the Board of Trustees ("Board") of Neuberger Berman Advisers Management Trust ("Trust"), including the Trustees who are not "interested persons" of Neuberger Berman Management LLC ("Management") (including its affiliates) or the Trust ("Independent Fund Trustees"), considers whether to continue the Management and Sub-Advisory Agreements ("Agreements") for Large Cap Value Portfolio ("Fund"). At a meeting held on October 22-23, 2013, the Board, including the Independent Fund Trustees, approved the continuation of the Fund's Agreements.

In evaluating the Agreements, the Board, including the Independent Fund Trustees, reviewed extensive materials provided by Management in response to questions submitted by the Board and counsel for the Independent Fund Trustees, and met with senior representatives of Management regarding its personnel, operations and financial condition as they relate to the Fund. The annual contract review extends over at least two regular meetings of the Board to ensure that Management has time to respond to any questions the Independent Fund Trustees may have on their initial review of the materials and that the Independent Fund Trustees have time to consider those responses.

In connection with its deliberations, the Board also considered the broad range of information relevant to the annual contract review that is provided to the Board (including its various standing committees) at meetings throughout the year, including investment performance reports and related portfolio information for the Fund, as well as periodic reports on, among other matters, pricing and valuation; brokerage and execution; and compliance, shareholder and other services provided by Management and its affiliates. To assist the Board in its deliberations regarding the annual contract review, the Board has established a Contract Review Committee comprised of Independent Fund Trustees, as well as other committees that focus throughout the year on specific areas relevant to the annual contract review, such as Fund performance or compliance matters.

Throughout the process, the Independent Fund Trustees were advised by counsel that is experienced in Investment Company Act of 1940 matters and that is independent of Management. The Independent Fund Trustees received from independent counsel a memorandum discussing the legal standards for their consideration of the proposed continuation of the Agreements. During the course of the year and during their deliberations regarding the annual contract review, the Independent Fund Trustees met with such counsel separately from representatives of Management.

---

In connection with its approval of the continuation of the Agreements, the Board evaluated the terms of the Agreements, the overall fairness of the Agreements to the Fund and whether the Agreements were in the best interests of the Fund and its shareholders. The Board considered all factors it deemed relevant with respect to the Fund, including the following factors: (1) the nature, extent, and quality of the services provided by Management and Neuberger Berman LLC (“Neuberger”); (2) the investment performance of the Fund compared to a relevant market index and a peer group of investment companies; (3) the costs of the services provided and the profit or loss realized by Management and its affiliates from their relationship with the Fund; (4) the extent to which economies of scale might be realized as the Fund grows; and (5) whether fee levels reflect any such potential economies of scale for the benefit of investors in the Fund. While each Trustee may have attributed different weights to the various factors, the Board’s determination to approve the continuation of the Agreements was based on a comprehensive consideration of all information provided to the Board throughout the year and specifically in connection with the annual contract review. The Board members did not identify any particular information or factor that was all-important or controlling. The Board focused on the overall costs and benefits of the Agreements relating to the Fund and, through the Fund, its shareholders.

With respect to the nature, extent and quality of the services provided, the Board considered the investment philosophy and decision-making processes of Management and Neuberger, and the qualifications, experience and capabilities of and the resources available to the portfolio management personnel of Management and Neuberger who perform services for the Fund. The Board noted that Management also provides certain administrative services, including fund accounting and compliance oversight. The Board also considered Management’s and Neuberger’s policies and practices regarding brokerage and allocation of portfolio transactions and reviewed the quality of the execution services that Management had provided. The Board also reviewed whether Management or Neuberger used brokers to execute Fund transactions that provide research and other services to Management or Neuberger and the types of benefits potentially derived from such services by Management, Neuberger, the Fund and other clients of Management and Neuberger. The Board also considered that Management’s responsibilities include daily management of investment, operational, enterprise, legal, regulatory and compliance risks as they relate to the Fund, and considered information regarding Management’s process for managing risk. In addition, the Board noted the positive compliance history of Management and Neuberger, as each firm has been free of significant reported compliance problems. The Board also considered the general structure of the portfolio manager compensation program and whether this structure provides appropriate incentives to act in the best interests of the Fund. As in past years, the Board also considered the manner in which Management addressed various non-routine matters that arose during the year, some of them a result of developments in the broader fund industry or the regulations governing it. In addition, the Board considered actions taken by Management and Neuberger in response to recent market conditions, including actions taken in response to changes in market volatility, and considered the overall performance of Management and Neuberger in this context.

With respect to investment performance, the Board considered information regarding the Fund’s short-, intermediate- and long-term performance on both an absolute basis and relative to a relevant market index (or benchmark) and the average performance of a composite peer group (as constructed by an independent organization) of investment companies pursuing broadly similar strategies. The Board also reviewed performance in relation to certain measures of the degree of investment risk undertaken by the portfolio manager. The Board factored into its evaluation of the Fund’s performance the limitations inherent in the methodology for constructing peer groups and determining which investment companies should be included in which peer groups. In this regard, the Board noted that performance, especially short-term performance, is only one of the factors that it deems relevant to its consideration of the Fund’s Agreements and that, after considering all relevant factors, it may be appropriate to approve the continuation of the Agreements notwithstanding the Fund’s recent performance.

With respect to the overall fairness of the Agreements, the Board considered the fee structure for the Fund under the Agreements as compared to a peer group of comparable funds and any fall-out benefits likely to accrue to Management or Neuberger or their affiliates from their relationship with the Fund. The Board also considered the profitability of Management and its affiliates from their association with the Fund. The Board reviewed a comparison of the Fund’s management fee and overall expense ratio to a peer group of broadly comparable funds. The Board noted that the comparative management fee analysis includes, in the Fund’s management fee, the separate administrative fee paid to Management, but it was not clear whether this was the case for all funds in the peer group. The Board considered the

---

mean and median of the management fees and expense ratios of each peer group. Noting that the Fund's management fee was higher than the peer group mean and median, the Board considered whether specific portfolio management, administration or oversight needs contributed to the management fee. In addition, the Board considered the contractual limit on expenses of the Fund. The Board also considered whether there were other funds that were advised or sub-advised by Management or its affiliates or separate accounts managed by Management or its affiliates with investment objectives, policies and strategies that were similar to those of the Fund. The Board compared the fees charged to the Fund to the fees charged to any such funds and/or separate accounts. The Board considered the appropriateness and reasonableness of any differences between the fees charged to the Fund and any such funds and/or separate accounts, including any breakpoints, and determined that any differences in fees and fee structures were consistent with the management and other services provided.

The Board also evaluated any apparent or anticipated economies of scale in relation to the services Management provides to the Fund. The Board considered whether the Fund's fee structure provides for a reduction of payments resulting from the use of breakpoints and whether any such breakpoints are set at appropriate asset levels. In concluding that the benefits accruing to Management and its affiliates by virtue of their relationship to the Fund were reasonable in light of the costs of providing the investment advisory and other services and the benefits accruing to the Fund, the Board reviewed specific data as to Management's profit or loss on the Fund for a recent period. The Board also carefully examined Management's cost allocation methodology.

## Conclusions

In approving the Agreements, the Board concluded that the terms of each Agreement are fair and reasonable and that approval of the Agreements is in the best interests of the Fund and its shareholders. In reaching this determination, the Board considered that Management and Neuberger could be expected to provide a high level of service to the Fund; that the performance of the Fund was satisfactory over time; that the Fund's fee structure appeared to the Board to be reasonable given the nature, extent and quality of services provided; and that the benefits accruing to Management and its affiliates by virtue of their relationship to the Fund were reasonable in light of the costs of providing the investment advisory and other services and the benefits accruing to the Fund. The Board's conclusions may be based in part on its consideration of the Agreements in prior years and on the Board's ongoing regular review of Fund performance and operations throughout the year, in addition to material prepared specifically for the most recent annual review of the Agreements.
